Powered by music

Music has enormous power to move us and arouse our emotions. We love it, we yearn for it, we are devoted to it. Its energy can advance technology and enrich our lives.
In the more than 120 years of our existence, Yamaha has been making steady progress, nourished by our unwavering enthusiasm for music. We're continually exploring the possibilities of sound, striving always to bring you a richer musical experience.

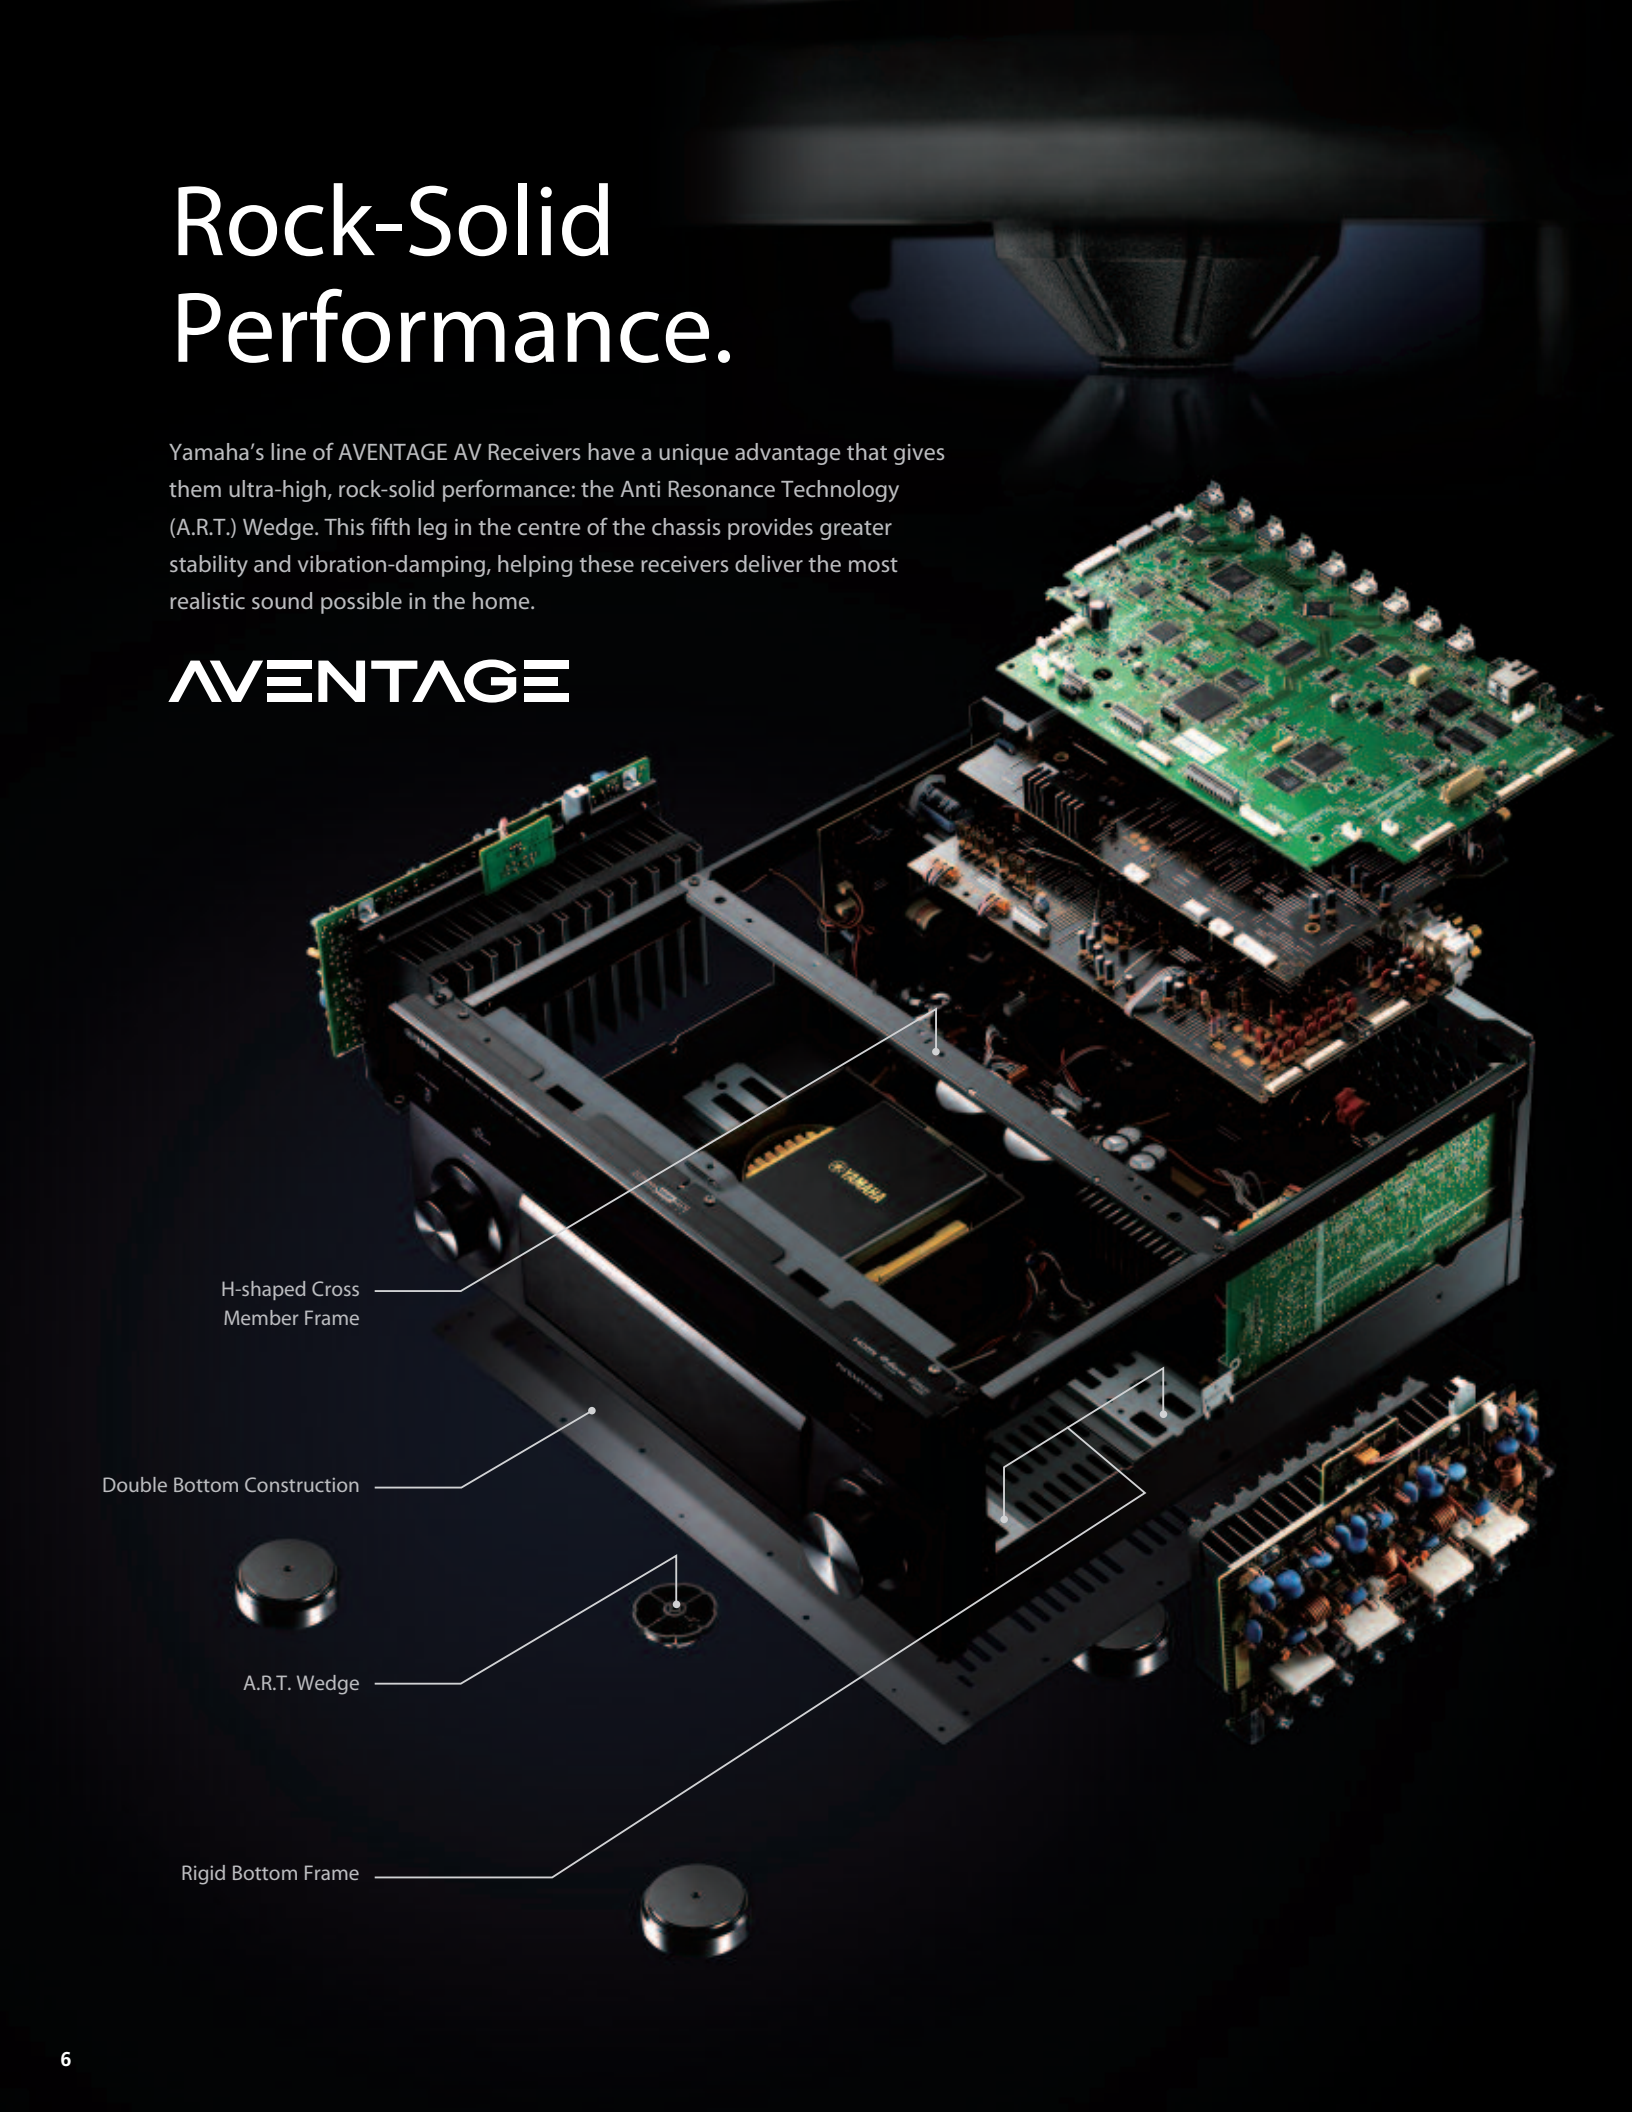
Professional control over the soundscape.

Yamaha has long been dedicated to helping artists excite and move people through live and recorded performances. Now we've used this experience and technological expertise to create the very finest AV receivers, which can create the highest quality surround sound fields.

Rock-Solid Performance.

Yamaha's line of AVENTAGE AV Receivers have a unique advantage that gives them ultra-high, rock-solid performance: the Anti Resonance Technology (A.R.T.) Wedge. This fifth leg in the centre of the chassis provides greater stability and vibration-damping, helping these receivers deliver the most realistic sound possible in the home.

AVENTAGE



Anti Resonance Technology Wedge for Advanced Vibration Damping

In order to make absolutely sure that the chassis will not vibrate or resonate in any way, Yamaha developed a new approach to supporting it by adding a fifth leg in the centre of the unit, called the A.R.T.* Wedge. It serves to further dampen vibrations from the power transformer, power transistors and heat sinks, as well as vibrations that might be caused by the sound from the speakers.

The RX-A3010 uses the same extra-large and heavy feet that are used on Yamaha flagship AV Amplifier, the DSP-Z11, to ensure perfect support of the heavy chassis.

* A.R.T. = Anti Resonance Technology

Internal Construction and Layout Designed to Further the Goal of Superlative Sound Quality

Because these AV Receivers use extra-large, heavy parts such as transformers and heat sinks, their internal construction has to be extremely strong and rigid. In addition to a rigid bottom frame, Yamaha added an H-shaped cross member frame for extra support. This reduces chassis vibration to virtually zero even during high volume output (seemingly minor vibrations can affect the sound), maintaining the highest audio quality.

In addition, the interior of the unit was precisely planned, circuit-routed and built so that the left and right channels are physically and electrically isolated. This Symmetrical Power Amplifier Layout maximises channel separation, but also greatly improves signal to noise ratio and helps to achieve a wide, open sound stage.

Yamaha Surrounds You with the Most Realistic Movie Sound You Have Ever Heard

The RX-A3010 features Yamaha's incredible CINEMA DSP HD^3, which literally takes the surround sound experience to new heights. By using two CINEMA DSP engines with advanced 3D processing and two front presence channels in a 9-channel configuration, it gives the sound field an enhanced vertical dimension for more realistic and exciting movie sound. You can even expand your system to 11.2 channels for unprecedented sound depth.

The 9.2-channel RX-A2010 envelops you in sound fields from nine separate channels and two subwoofers. Their CINEMA DSP 3D programmes create wide, high and dense sound fields for sensational surround sound.

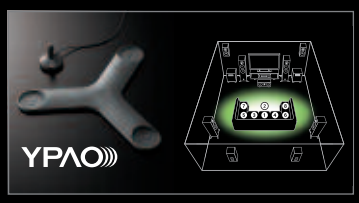
* The RX-A710, RX-A810 and RX-A1010 also features CINEMA DSP 3D.

Professional Grade Acoustic Calibration Automatically

Multi-point YPAO-R.S.C. (Reflected Sound Control) analyses room acoustics, then precisely calibrates audio parameters to achieve optimum sound at any of several listening positions. It employs Reflected Sound Control to correct early reflections for studio-quality sound, as well as DSP Effect Normalisation, which varies the CINEMA DSP parameters according to the reflected sounds. The RX-A3010 also performs speaker angle measurements, for even more detailed sound adjustment.



A New Level of Operating Convenience

Even the AVENTAGE remote control unit is a superior piece of engineering. It provides fast and easy control of the many functions that these receivers offer.

Presenting Yamaha's extraordinary new RX-V 73 AV Receiver Series. Along with top quality sound and functions, these receivers also give you operation and streaming music playback from your smartphone —for superb performance and outstanding control.

Smart and Fun Fingertip Control with AV Controller App

This exciting feature lets you use your smartphone or tablet as a remote, giving you simple flick-and-tap controls for various receiver operations, including Music Play wireless music streaming. The crisp, attractive and easy-to-use graphics are a plus, too. Just download the free Yamaha AV Controller App from the iTunes App Store or Android Market, and you're ready for smooth operation from the comfort of your own smartphone (Apple iOS or Android). Tablet versions are also available.

All-in-One Beautiful Soundbar
Dual front speakers, dual-driver subwoofer and a resonance tube produce powerfully dynamic 7.1-channel sound. The crystal black finish makes this a stunningly beautiful unit.

7.1-Channel Virtual Surround with Clear Vocals and Rich Sound
This exclusive Yamaha system outputs 7.1-channel sound with high quality, excellent imaging and rich presence, for an extremely realistic sound field with clear dialogue in the front and dynamic sound from back and sides.

TV Remote Control Learning Function
The YAS-101 can "learn" the TV remote control operation, so you can use the TV remote control to turn the YAS-101 on and off and to adjust its volume.

Clear Voice Makes Dialogue and Narrations Easy to Hear
Clear Voice raises the level of dialogue and narrations while maintaining overall sound quality. Movies and TV shows, sports commentary and news broadcasts are more clearly audible.

What colour is your music?

Various styles, numerous designs, a whole palette of colours.
Chose the one you like best, the one that says, “This is me!”
Enjoying music has never been so free and so fun.

Music in Living Colour

Music eases your day.

Restio

Rest after your day with a new style audio.
It's Entertaining.
Energizing.
Relaxing in the evening, invigorating in the morning.
With sophisticated styling and superb sound,
its an endlessly enchanting companion.

Beautiful Sound from a Uniquely Stylish Audio System.

Minimal Design Allows Flexible Placement

With a 9cm (3-1/2") body and a half-moon shaped stand, you can position Restio right up against a wall. What's more, the standalone style doesn't require a shelf, so there are no restrictions on where you can put it. You can even remove the stand and hang it on a wall (requires an optional bracket AT-800). It's the perfect way to match your music source to any room's decor.

Music in the Air... From Everywhere

Restio's two-way, four-speaker system gives you premium quality sound with powerful, expansive bass and crisp, precisely contoured treble. It also includes a three-band equaliser. Dock your iPod or iPhone directly into the top for a high quality digital connection, and if you have an app, you can enjoy streaming music. Restio also has a CD player, radio, and USB and Aux-in terminals.

Always Close to You... a Beautiful Clock

The stylish digital clock gives you a choice of two patterns: the usual number display and a unique display that combines numbers and an indicator. An auto dimmer function adjusts the brightness of the display to match the brightness of the room. It also features Yamaha's IntelliAlarm, which first gently plays the music of your choice and then beeps to ensure that you are fully awake.

Clock showing 3:17.
The indicator is in the hour position, the numbers show the minutes.

yAired

yAired makes it easy to enjoy music from your iPod/iPhone via a wireless link. You also get outstanding sound quality, because yAired technology transmits uncompressed data so there is no loss of signal data, unlike systems that use Bluetooth technology to send compressed data. In addition, there is no delay time, ensuring that sound and video are always in sync.

IntelliAlarm™

Ease into your day with a new approach to waking up. Yamaha's new IntelliAlarm wakes you gently with the audio source of your choosing, first filtering out uncomfortable high frequencies, then gradually restoring the full audio spectrum before beeping to ensure you are awake. This function makes the waking experience as comfortable as possible.

The best way to enjoy your iPod/iPhone at home — the highest sound quality, the most convenience.

Deep Speaker Cabinets for Robust Sound

The stylishly designed MCR-040 produce clean, well-balanced sound that's surprisingly powerful. Even the bass sound is deep and robust, thanks to a baffle board and a large-volume cabinet that acts like a bass drum. This construction draws from our decades of experience manufacturing musical instruments.
